Preamble:

Psychology is the study of the human mind and the cognitive processes that underpin behaviour. The study of psychology is based on research and evidence gathered through observation, measurement, and experimentation. The discipline focusses on describing, understanding, explaining, predicting, and modifying behaviour and mental processes. The aim is to help people understand themselves and others so that they can bring about change and improve the quality of life for themselves and those around them.

The B.A. Psychology programme focusses on exposing students to the core tenets of Psychology, accentuating the significance of interpersonal skills, and fostering within its researchers and practitioners, a scientific temper. The course has been designed to also generate awareness about mental health issues and inculcate, among students, a sensitive approach to psychosocial issues. The programme has been developed to ensure a mix of academic rigour with an exposure to real-world issues and the Department of Psychology has been organising conferences, seminars, guest lectures, and film screenings to further the learning process of students.

Psychology is one of the fastest-growing disciplines with developments in information technology, artificial intelligence, brain imaging, molecular biology, and neuroscience making it multidisciplinary, challenging, and exciting. The programme fosters empathy, critical thinking, and research skills among students, enabling them to pursue careers in mental health care, academia and research, human resources, rehabilitation, media, law, special education, neuropsychology etc.

PROGRAMME OBJECTIVES
